## Technical Datasheet

## Performance Series Bellows Operated Pressure Switch

Models: 201, 202, 203 \& 281

## Key Features

- Precision stainless steel mechanism for arduous atmospheres and high humidity.
- Set point adjustable over whole range against calibrated scale with tamperproof adjuster.
- Weatherproof and Flameproof models ATEX and IECEx.
- Safety vented or blow out device as standard.
- NACE MR-01-75 compatibility.
- Hermetically sealed microswitch option.
- Models for fixed switching differential, adjustable differential and HI-LO operation.
- Precise and accurate operation guaranteed by use of hydraulic formed bellows, or capsule stack.
- Ranges available up to 75 bar ( $1,000 \mathrm{psi}$ ). Static pressure up to 100 bar (1,400 psi).

## Series Overview

- Designed in the mid-1970s and developed over subsequent years, the Performance Series switch range offers users the broadest range of options, the highest levels of set-point repeatability and the confidence of long term performance that a mature product such as this can prove.
- The models 201/202/203/281 Performance Series pressure switches utilise bellows type sensor that offer a very linear response to pressure change. This sensor, coupled with a precision stainless steel mechanism designed to minimise friction in the moving parts, helps deliver the market leading performance customers have come to expect from the series.

## Product applications

The 201 Performance Series is suitable for a wide range of applications in:

- Oil \& Gas
- Chemical
- Petrochemical
- Refining
- Power
- Food Industry

The choice of models available ensures that the 201/2/3/281 Performance Series is suitable for use in:

- Corrosive atmospheres
- Resistant to chemical attack

How can we help you?
Delta Mobrey offers fast, efficient and knowledgeable support when and where you need it. Please visit our website at www.delta-mobrey.com to find your local support centre or call us on:
+44 (0) $1252 \mathbf{7 2 9 1 4 0}$

## How to order

Switches can be configured by selecting codes representing the desired features from the tables that follow. The chart below, describes how the model code is built up. For assistance in configuring a switch that best suits your needs,

NOTE: Options shaded in the following tables are the most common options and are available on the quickest lead-times and at the lowest cost.

NOTE: Only the most common options are shown in this data sheet. Should you require a feature that is not shown, please contact your local sales office for further details.
NOTE: The non-standard option code is shown by " $X$ " in the part number. Should you require any clarification on this codes please contact your local sales office.

## Technical Specification

## Accuracy:

## Storage Temperature:

Ambient Temperature:

Maximum Process Temperature:

Maximum Enclosure Temperature:

Enclosure classification:
Switch output:

## Electrical rating:

Process Connection:
Approximate Weight:

Set point repeatability $\pm 0.5 \%$ of span at $20^{\circ} \mathrm{C} / 68^{\circ} \mathrm{F}$ ambient Scale accuracy $\pm 2 \%$ of full scale.
-25 to $+60^{\circ} \mathrm{C} /-13$ to $+140^{\circ} \mathrm{F}$
-25 to $+60^{\circ} \mathrm{C} /-13$ to $+140^{\circ} \mathrm{F}$
Special build is also available for temperatures down to $-60^{\circ} \mathrm{C}\left(-76^{\circ} \mathrm{F}\right)$
Whilst component parts can withstand $60^{\circ} \mathrm{C}\left(140^{\circ} \mathrm{F}\right)$, process temperatures up to $+120^{\circ} \mathrm{C}\left(+248^{\circ} \mathrm{F}\right)$ are subject to appropriate installation practice.

Instrument has not been tested regarding maximum temperature with respect to dust layer above 50 mm . Therefore product is not suitable for operating under excess layer of dust.

IP66 / NEMA 4X / Flameproof Exd
SPDT or DPDT snap action microswitch (standard) Hermetically sealed (optional)

See Table 6
Rc $1 / 4$ (BSP), $1 / 4$ NPT Internal, $1 / 2$ NPT Internal \& $1 / 2$ NPT External
Enclosures: "W \& N" 3.1kg/6.8lb; "A \& O" $3.9 \mathrm{~kg} / 8.6 \mathrm{lb}$; "H" 4.6kg/10.2lb; "K" 9.4kg/20.7lb.

## Enclosure

## FINISH

All enclosures except Type A are finished in light grey epoxy resin paint. Special finishes to order.

## INTRINSIC SAFETY

Because of the low voltages and currency of I.S. circuits, we recommend using gold and/or sealed contacts.

NOTE: Enclosure Codes W \& A with range $\mathrm{BC}, \mathrm{C} 6, \mathrm{E} 1$ and $\mathrm{E} 8(\mathrm{BU}, \mathrm{CP}, \mathrm{E} 4$, E ) have weather protection reduced to IP54. In the interests of reliability not all enclosures are available with all wetted parts materials. See Table 4.

Temperatures in Table 1 refer to limitations for certified enclosures.

See TECHNICAL SPECIFICATION

## Models

## NOTE:

Models 202, 203 are not supplied with all materials of wetted parts. See table 4.

TABLE 1

| ENCLOSURE TYPES | Code |
| :---: | :---: |
| Weatherproof Enclosures |  |
| General Purpose <br> The basic enclosure is pressure die-cast in zinc alloy, offering weather protection not less than NEMA $4+13 / I P 66$. | W |
| For Aggressive Atmospheres Investment cast enclosure in austenitic stainless steel with weather protection not less than NEMA 4X + 13/IP66. | A |
| Flameproof Enclosures Category 2 (Zone 1) |  |
| ATEX Ex db IIC T6 ( -60 to $+40^{\circ} \mathrm{C}$ ), $\mathbf{T 4}\left(-60\right.$ to $\left.+80^{\circ} \mathrm{C}\right)$ II 2 G D Gravity die-cast enclosure in aluminium-silicon alloy. Suitable for outdoor use, IP66 / NEMA 4. <br> Ex II 2 GD | H |
| IECEx Ex db IIC |  |
| ATEX Ex db IIC T6 ( -60 to $+40^{\circ} \mathrm{C}$ ), $\mathbf{T 4}\left(-60\right.$ to $+80^{\circ} \mathrm{C}$ ) II 2 G D As Code H, but sand cast in high quality grey iron. | K |
| IECEx Ex db IIC |  |
| Exn Enclosures Category 3 (Zone 2). |  |
| Type of Protection Exn II T6 (-25 to $\left.+60^{\circ} \mathrm{C}\right)$, T4 (-25 TO $+80^{\circ} \mathrm{C}$ ) II 3 G D <br> As code 'W' but Exn. <br> Weatherproof to NEMA 4/IP66. <br> Limited switching facility (see Table 6). <br> II 3 G D | N |
| As ' N ' but with investment cast enclosure in austenitic stainless steel as 'A'. | 0 |

## TABLE 2

|  | Code |  |
| :--- | :---: | :---: |
| Fixed Switching Differential <br> See Tables 10A \& 10C. <br> Basic model giving close, fixed switching differential using <br> proprietary microswitch operated by high integrity stainless steel <br> mechanism. Set point field adjustable over full range against <br> calibrated scale. SPDT \& DPDT options available. | 201 |  |
| Adjustable Switching Differential (Limited Span) <br> See Tables 10B \& 10D. |  |  |
| Achieved by special microswitch with built in adjuster, SPDT only. |  |  |
| Not available with enclosure code N or O. |  |

## Electrical Entry

Adaptors are available for other popular thread sizes.

## Enclosures 'W' and ' N '

Standard option code $1(22 \mathrm{~mm}$ dia) is provided with a nylon $22 / 20$ reducer and fibre washer suitable for a standard M20 cable gland and back nut. Option code 0 elbow adaptor is factory fitted. Adaptor kits may also be provided retrospectively to fit at site if required. Ask for details. See diagrams for dimensions.

## 'W' and 'N' SAFETY NOTE

If a metal cable gland is site fitted it must either be earthed locally or an earth/gland plate must be used to connect the body of the gland at the enclosure earthing point. Earth/gland plates can be provided either factory fitted or in kit form for site assembly. Ask for details.

Material of Wetted Parts

Not all ranges are available with all materials. Refer to Table 5 for availability.

## Setting Ranges

$P_{\text {max }}=$ maximum working pressure
Ranges $\mathrm{BC}, \mathrm{C} 6$ \& E 1 ( $\mathrm{BU}, \mathrm{CP}, \mathrm{E} 4$ ) not available on Model 202. Range G1 (GF) is only available as Models 201/281.

§ Range BC \& C6 (BU, CP) not available on HI-LO model (281).

TABLE 3

|  | Code |
| :--- | :---: |
| Enclosures W \& N: Clearance for 20mm (3/4 in) outside dia conduit. | 1 |
| Enclosures H, K, A \& O: M20 x 1.5 ISO thread (direct) | 0 |
| Enclosures H \& K: M20 x 1.5 ISO thread, dual entry. | 5 |
| Enclosures H \& K: 3/4-NPT INT. | 3 |
| Enclosures H \& K: 1/2-NPT INT. | 2 |
| Enclosures H \& K: 3/4-NPT INT dual entry. | 6 |
| Enclosure W: M20 x 1.5 elbow adaptor. | 0 |
| Enclosure W: 1/2-NPT INT elbow adaptor. | 2 |
| Enclosure W: 3/4-NPT INT elbow adaptor. | 3 |
| Enclosure N: M20 x 1.5 straight adaptor (Approved). | 0 |

## Switch Options

TABLE 6

A much wider variety of switching options can be engineered to customer's requirements for Model 201 switches including heavy DC, manual latching, pneumatic output etc. On Models 202, $203 \& 281$ only the switching options specified can be supplied. Please consult our engineers for further information.

The electrical rating is dependent on the microswitch fitted to the instrument. The electrical ratings defined by each approval that the microswitch complies with and is shown on the product nameplate, ie CSA, or IEC. It should be noted that the instrument must be used within the electrical rating specified from the approval you require. This table lists the actual IEC ratings against the Designation \& Utilisation Category marked on the nameplates. In the absence of any verification by CSA the microswitch § manufacturer's rating is stated in italics and bold. If in doubt seek guidance from the factory.
NOTE: For low energy circuits e.g. 30 V and up to 100 mA , we recommend using gold alloy contact switches.
$\mathrm{Ui}=$ rated insulation voltage Uimp = rated impulse to withstand voltage across contacts.
*Suitable for use with Exn Enclosures (See Table 1)

## Process Connection

Other thread specifications and sizes are available without using adaptors.

Adaptors are available for applications where their use is permitted.

## Options \& Treatments

Combinations available, apply for details.

## Electrical Connections

## Terminal Block

Cable entry is to a non-pinching terminal block made of a non-hygroscopic thermosetting plastic, suitable for cables up to $2.5 \mathrm{~mm}^{2} / 14 \mathrm{AWG}$.

Earthing/Grounding
An earthing stud is provided inside all weatherproof enclosures, adjacent to the entry.External earthing is standard on flameproof versions. Safety note see Table 3.

## Dielectric Strength

The electrical assembly is capable of withstanding *2kV between live parts and earth/ground and 500 V between open contacts.

* 1.2kV for micro switch Codes $\mathrm{H} 2, \mathrm{H} 3, \mathrm{H} 4$ and H6. Refer to Table 6.

## Electrical Entry

Standard options are listed in Table 3. Other threads can be accommodated by adaptors. Dual entry available, see Table 3.

## Optional Extras

## Chemical Seals

Chemical seals of our own or proprietary manufacture can be fitted when required.

## Mounting Position/Location/Installation

Vertical as shown, IN DIMENSIONS, taking care to avoid siting in locations that transmit excessive shock or vibration. For further advice contact our engineers.

Pollution degree (EN60947-5-1)
All products are suitable for use in pollution degree 3 . For extreme conditions where condensation may readily form, then sealed contacts should be used. See Table 6 Codes 08/09, 0G/0H, 2G, 28, H2/H3/H4/H6.

## Electrical Isolation

These products are not suitable for electrical isolation. Always isolate circuit separately to carry out any electrical work.

## Approvals

## EUROPEAN DIRECTIVES

## Low voltage Directive (LVD) 2014/35/EU.

Compliant to LVD
Pressure Equipment Directive (PED) 97/23/EC:
This product has a process connection size <=DN25 and is therefore categorised as sound engineering practice under Cat 3.3

## ATEX APPROVALS

FLAMEPROOF:
Certificate No. BAS01ATEX2426X
EN 60079-0, EN 60079-1, EN 60079-31
